

How to Onboard Drivers

6 WAYS TO MAKE ONBOARDING EASY (BEFORE ORIENTATION EVER BEGINS)

1. FORMS CAPTURE

Reduce in-person time filling out paperwork. Forms Capture enables drivers to fill out forms online before or during orientation and provides carriers process updates, shortens orientation, and ensures all paperwork is complete and legible.

2. TRAINING CONTENT LIBRARY

Engage your drivers and make remote onboarding possible with Tenstreet's proprietary, interactive video training and testing library. It sets drivers up for success, shortens orientation, and gets drivers on the road quickly, while making knowledge stickier.

3. CONFIRMATION INTELLIAPP

Simplify application updates by sending drivers a modified version of their application for them to confirm and sign digitally. Confirmation IntelliApp handles submissions gracefully, eliminating messy or illegible applications, and getting to a full app faster.

4. PULSE MD

Get clued in to the drug-screening process with real-time activity updates and results delivered directly to Xpress. Pulse MD lets you operate using a completely electronic chain of custody, simplifying the cumbersome drug-screening process and allowing you to test drivers before they arrive at orientation.

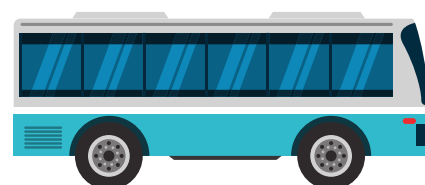

5. DOCUMENT UPLOADER

Save precious time and stop using scanners to collect documents during orientation. With Document Uploader, drivers simply take a photo of their CDL (or any other document) with their smart devices. Documents automatically push to the driver's record in Xpress, shortening class time, and making document collection a breeze.

6. GREYHOUND

No need to order bus tickets from a separate site. Our Greyhound integration adds a world of convenience by allowing you to easily order, track, and manage tickets from the Xpress dashboard. Travel details are saved and shared to the Pulse app in drivers' phones - meaning no more lost tickets.

TENSTREET

We help companies succeed in a paperless environment, assist clients in recruiting and retaining drivers, and ease the lives of our clients and drivers alike.
