

# How to Onboard Drivers

5 WAYS TO MAKE ONBOARDING EASY (BEFORE ORIENTATION EVER BEGINS)

## 1. FORMS CAPTURE, VIDEO, & TESTING

No more duplicating information - leverage data already captured during the application process. Digital forms, training videos, and tests can be completed from the comfort of a driver's home, enabling carriers to accelerate their orientation processes and keep drivers happy.

## 2. CONFIRMATION INTELLIAPP

Simplify application updates by sending drivers a modified version of their application for them to confirm and sign digitally. **Confirmation IntelliApp** handles submissions gracefully and eliminates messy or illegible applications.

## 3. PULSE MD

Get clued-in to the otherwise mysterious drug-screening process with real-time activity updates and results delivered directly to Xpress. **Pulse MD** lets you operate using a completely electronic chain of custody, removing the headache from the cumbersome drug-screening process and allowing you to test drivers before they arrive at orientation.

## 4. DOCUMENT UPLOADER

Save precious orientation time and stop using scanners to collect driver documents during orientation. With **Document Uploader**, drivers simply take photos of their CDL or SSN card (or any other document) with their smart phones. Documents are pushed into the driver's record in Xpress so you have all the necessary documentation before orientation ever begins.

## 5. GREYHOUND

No need to order bus tickets from a separate website. Our **Greyhound** integration adds a world of convenience by allowing you to easily order tickets directly from the Xpress dashboard. Travel details are saved in tagging and reporting and are sent directly to drivers' phones - meaning no more lost tickets.

**TENSTREET**

We help companies succeed in a paperless environment, offer the fastest-time-to-hire, and ease the lives of our clients and drivers alike.
