TENSTREET SAFETY

Tenstreet's electronic DQF system helps ABC Trucking's safety team:

- Check for expiring driver MVRs via digital documents report
- Order MVRs on all drivers with the Bulk MVR ordering tool
- Automatically share requests for driver COVs
- Update and upload all DQF files automatically
- Countersign through Driver Pulse to complete each driver's MVR process for the year

SOLUTION

A driver accidentally puts diesel in his unleaded tank!

MONTH 6

CHALLENGE

A surprise audit!

SOLUTION

Automated safety and compliance tools that quickly go to work:

- A pre-defined number of points are automatically attributed to his record in the driver management tool
- Since the driver leverages Driver Pulse, he reports the issue through the app, automatically attaching a standardized incident form to his DQF

MONTH 5

CHALLENGE A driver gets in an accident!

SOLUTION

 The safety team, once notified, reviews dashcam footage enabled via the telematics integration tool

A step-by-step response embedded with safety protocols:

- The driver uses the Accident Response checklist to document the incident with photos and info, and is automatically enrolled in a safety training course
- The driver completes his safety training and the points drop back off his record

MONTH 7

CHALLENGE

A safety violation

SOLUTION

Tenstreet's CSA integration tool kicks into gear:

- The safety manager is notified
- The infraction → action feature automatically assigns the driver a training module that corresponds with his violation, which can be completed through the Driver Pulse App on his phone
- The safety manager is notified once the training is completed

MONTH 8

A well-prepared safety team that's ready to:

driver out of their digital DQF

PDF to the auditors

Download the DOT-required documents for every

Report for all of ABC Trucking's drivers and send the

Download the Comprehensive Accident Registry

Make available any further documentation

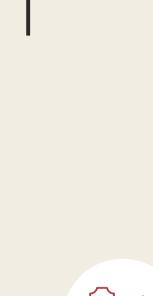

CHALLENGE

HR department adds a new policy document

SOLUTION

When the safety manager creates a new HRspecific document category, drivers are notified to complete the new document from their mobile device, which then automatically uploads into their DQF file.

CHALLENGE

You hire a new driver

SOLUTION

On Tenstreet's platform, new driver motor vehicle records automatically flow into their DQF. Any changes to their safety record will automatically be updated in their file.

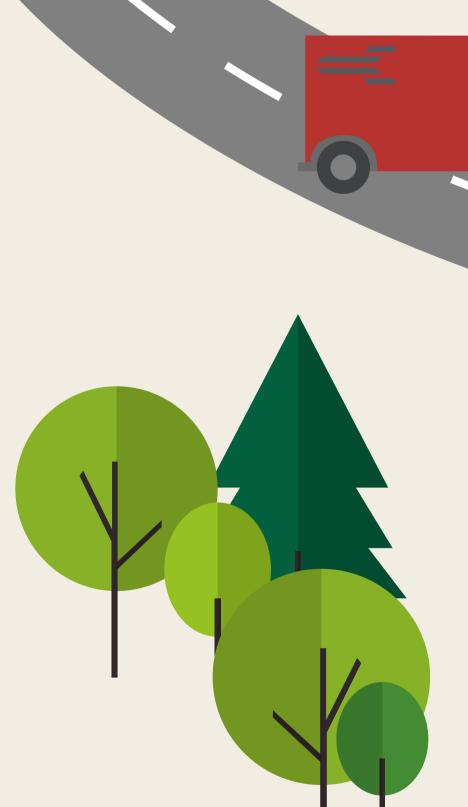

Ensuring the gas tank incident from Month 4 is resolved

SOLUTION

The Driver Management Tool will ensure that the points the company assigned months ago will drop off a driver's record after sufficient time has passed.

ABC Trucking celebrates the time, energy, and effort they saved by using Tenstreet's safety tools and looks forward to a second year of savings!

Several drivers incur points on their records

SOLUTION

Broadcast, a communication tool the safety

manager can use to run a video meeting for drivers offering coaching and training materials to help them knock points off.

THE TENSTREET ADVANTAGE

EVENT MANAGEMENT

Gives you full visibility into all the events that span a driver's history. Automatically connects pre-hire with post-hire, pulls data from CSA and popular telematics partners, and leverages Driver Pulse for easy document sharing, corrective training and coaching, quick communication, and more.

CSA INTEGRATION

Provides total transparency into how your drivers are performing and sends you and your drivers on the road to improved safety. Our CSA service pulls daily carrier and driver FMCSA CSA data into the Tenstreet dashboard and features "infraction — action", a groundbreaking approach in helping carriers promote a culture of safety in their organization that identifies and assigns corrective training to drivers based on the CSA infraction they received.

compliance.

DRIVER MANAGEMENT No more losing track of your drivers' accidents and incidents with this high-level, cumulative view of your drivers' history. Create your own points system that uses automated workflow to send video trainings and quizzes to drivers to

keep them on course with industry standards, regulations, and company policies.

TELEMATICS INTEGRATIONS Review ELD-triggered dashcam events in your dashboard, set statuses, make notes within the dashboard about events you review, and run additional processes for the driver through telematics integrations with Lytx, KeepTruckin, and Geotab. Assign followup training modules to take action in a

more meaningful way and use automation to make all this

work easier for you while maintaining higher levels of

BULK MVR

Ordering annual MVRs one at a time is now a thing of the past - simply select the subset of drivers you want to target using custom search criteria (like an anniversary month) and order all your MVRs in a matter of seconds.

Designate Tenstreet as your TPA and we'll make life with the

CLEARINGHOUSE SERVICES

Clearinghouse easier every step of the way. We use our Driver Pulse network to reach drivers for a faster turn-around time to help you minimize any negative effect on your timeto-hire. We offer in-house support from a dedicated full query Clearinghouse team, driver outreach and education, and reminders and forms. Carriers also get automated annual bulk limited query ordering, adverse action support, DQF alerts, and reporting.

ENHANCED DQF Unburden yourself from mountainous stacks of paper and a tangled Annual MVR process. The DQF Control Center

reports missing/expired documents, lets you create custom alerts, request driver documents, and free yourself with stress-free, accurate file reporting.
